DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 21 March 2008 has been entered.
2. The indicated allowability of claims 1, 4-7, 11 and 14 is withdrawn in view of the newly discovered reference(s) to Volodarsky et al and Black et al. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5-7 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Volodarsky et al (USPN 5,803,799). Volodarsky et al discloses a wafer polishing head 10 for polishing a wafer W comprising a carrier 20 for loading a wafer W, a wafer adhering layer 52 disposed beneath the carrier 20, a retaining ring 22 surrounding the carrier 20 and the wafer adhering layer 52, a first pressure chamber 42 having a first inner pressure disposed above the retaining ring 22, a second pressure chamber 28

Art Unit: 3723

having a second inner pressure disposed on the carrier 20, a relative height between the retaining ring 22 and the carrier 20 can be adjusted by changing the first and second inner pressure, an automatic control system respective coupled to the first pressure chamber 42 and the second pressure chamber 28 for adjusting a relative height between the carrier 20 and the retaining ring 22, regulating device 32, 46 for adjusting fluid pressure in the first and second pressure chambers 42, 28, ordinary skill in the art would understand that a controller (computer) controls the regulating device by converting data to digital signals for controlling regulating devices 32, 46 (note Fig. 1, col. 2, line 37 to col. 4, line 51).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Volodarsky et al (USPN 5,803,799) in view of Black et al (USPN 6,077,151). Volodarsky et al discloses the claimed invention as described above, Volodarsky et al does not disclose a chamber is partially filled by a liquid. Black et al discloses a chamber can be filled with liquid or gas (note Fig. 1, col. 2, line 60 to col. 3, line 3). It would have been obvious to one having ordinary skill in the art at the time the invention was made of modify the wafer polishing head of Volodarsky et al with a chamber filled with a liquid as disclosed by Black et al in order to control the temperature of the wafer.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 4-7, 11 and 14 have been considered but are moot in view of the new ground(s) of rejection.

Terminal Disclaimer

8. The terminal disclaimer filed on 1 August 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Patent Number 6,220,930 has been reviewed and is accepted. The terminal disclaimer has been recorded.
